Note: Test kits are available to determine 2,4-D concentration in waters treated.

\*= Do not use treated water to irrigate the following for 7 days after the treatment: annual nursery or greenhouse crops including hydroponics and newly seeded or transplanted annual crops, newly seeded or transplanted ornamentals, and newly sodded or seeded turf.

\*\*= If treated water is intended to be used only for crops or non-crop areas that are labeled for direct treatment with 2,4-D and or Tricopyr such as pastures, turf, or cereal grains, the treated water may be used to irrigate and/or mix sprays for these sites at anytime after the aquatic application.

\*\*\*= Do not use treated water for hydroponic farming, irrigating greenhouses or nursery plants

†= Do not use treated water for animal consumption within the following periods:

0.5 ppm dipotassium salt - 7 days after application

4.25 ppm dipotassium salt - 14 days after application

5.0 ppm dipotassium salt - 25 days after application

††= Do not use treated water for animal consumption within the following periods:

0.3 ppm - 7 days after application

3.0 ppm - 14 days after application

5.0 ppm - 25 days after application

*This chart is intended for use only as a guide in providing general information. Always read and follow the product label instructions, applications, and restrictions.*

**Pesticide sales and use are regulated by various state and federal agencies.**

**Consult them regarding these regulations and restrictions.**
