## SHAKE WELL BEFORE USING

Do not add water to container.

*AQUATIC SINKING POLYAN* will sink spray solutions when used at higher rates.

**SUGGESTED RATES:** Use 1-2 gallons per 100 gallons of spray solution. Add slowly while agitating 3-4 minutes.

*TERRESTRIAL DRIFT CONTROL POLYAN* is formulated to aid the control of drift in spray solutions.

**SUGGESTED RATES:** Use 1-8 ounces per 100 gallons of spray solution. *POLYAN* should be added slowly to spray solution while agitating. Allow 3-4 minutes of agitation before spraying; longer agitation will increase viscosity.

Rates can vary dependent upon pressure, spray solution, wind speed, nozzle selection and configuration.

For sinking, rates can vary with flow of water.

**STORAGE AND DISPOSAL:** Do not store near heat or open flame. Store in original container. Do not re-use empty container. Triple rinse (or equivalent) then dispose of or recondition container through the regulations set by local and state authorities.
